### **ABSTRACT**

Financial analysis can be undertaken by the business itself or by the different stakeholders of the business. Financial analysis distinguishes between accounting profits and economics profits changes in the status of financial position. It highlights utility of financial analysis in credit analysis and competitive analysis as well as in determining financial strength and performance of the bank.

Present paper is concern of such analysis of India's largest and public owned bank i.e. state bank of India, this bank has its presence in every parts of the India either directly or through its eight associate banks. It represents the nation in its national and international operations. Therefore, present paper is an attempt to examine the strength and its performance in the present context of international financial crisis and domestic financial imbalance and other factor which affect the banking operations directly and indirectly in a simplest possible manner.

**KEY WORDS:** Financial performance, state bank of india.
