

NEED FOR JOYFUL LEARNING

DR. (MRS.) RANI VAIDYA

GUEST FACULTY IN EDUCATION DEPARTMENT,
RANI DURGAVATI UNIVERSITY, JABALPUR,
MADHYA PRADESH, INDIA

ABSTRACT:

Computer education should be envisaged at three levels. The first stage would be to orient teachers and children to computers; second stage would be providing computer aided learning and third stage would be computer-based learning (computer literacy). Computer aided learning would be used by teachers as a teaching aid and also by students for remedial learning. Use of effective graphics, animations, audio, imaginative, analogies and simulations should also be encouraged. Computer based learning would not only make learning interesting and joyful, but also induce novelty in thinking approach of the children and enhance their imagination power

KEY WORDS: computer-based learning, computer literacy, Joyful learning
