ABSTRACT:

Information is all round us and is the staple diet of human beings. Information is variously perceived as facts, intelligence, data, news and knowledge. Information has been a common ingredient to all areas of human endeavor, be it the day-today affairs of business, matters of life and death or the most trivial of pursuits. Over the past twenty seven years, academic libraries have been affected by changes in information and communication technology. The rate of changes is still accelerating in this area. This study has an attempt to study the usability of students towards the ICT enabled Libraries. There are 29 deemed Universities libraries among which 10 university at Chennai have been selected exclusively for this study purpose. Results of the study would best representing students' usability. Studies reveal that 75% of the deemed universities students has more utility by ICT enabled Libraries

KEY WORDS: : ICT, Deemed Universities Libraries, Students
