ABSTRACT

India is the second largest producer of the firms output where majority of population depends on the agricultural activities for their livelihood. Growth of Industries and openings of MNCs have not yet declined the importance of agriculture in India. Economic development is not a sole function of Industrial development; it also includes development of agriculture. Sustainable development is the need of the time and it can only be achieved through balanced growth of both agriculture and Industrial sector. There is a popular saying “Countries are known for their greenery, and India is one of those country. Growth of agriculture and growth of fertilizer Industry supplement each other. Both go hand in hand. The article attempts to present a broad view of fertilizer Industry in Indian perspective. Through the use of secondary data, attempts have been made to study issues like demand and supply position, consumption trends, growth factor of fertilizer in India.

KEY WORDS: Agriculture, Development, Fertilizer Industry, Growth.
