ABSTRACT

Today success in the global market place means creativity and applying new knowledge – which is to say new technology-faster than ones competitors. World winners will be those who develop talent, technologies, techniques and tools so advanced that there id no competition. The paper prescribes “dream big” for universities and colleges. They should aim at technology generation, technology diffusion, which is achieving his significance in enabling a nation to win. This paper emphasizes adoption of new organizational inventions like Research Park-technology work, which when implemented will contribute to India’s international competitiveness.
