ABSTRACT

Education is an integral part of the entire human life. It is an essential and significant factor in the development of human beings. Education intrinsically linked with all developmental goals such as supporting the child development, improving student's mental health and controls the socio- economic and emotional problems. Sometimes the emotional problem of an individual may affect teaching – learning process in the classroom. The teacher emotion affects students and the student's emotion affects the teachers too. Among these, emotion is one of the most powerful initiative and base for all social evils like emotional outburst in the society. This paper describes the possible way to control emotions through education.

KEYWORDS: Education, development, classroom.
