ABSTRACT

E-Learning is found to be highly emerging knowledge tool today. It has wide scope in developed as well as in developing countries. The areas which are undeveloped and not so educated get attraction of E-Learning. E-Learning provides a method of delivering knowledgeable contents through CD, DVD, multimedia and other tools. The main constraint identified in this process is availability of proper bandwidth, willingness of E-Learners and some sort of skill set to deliver the material to learners. Overall we found E-Learning is beneficial to gentry for knowledge, better job opportunities, and promotions and to learn new developing technologies in the market. The paper emphasized that in the national policy of ICT for education, the policy makers paid more attention in rural areas and its student education standard while implement ICT for education programme. It is a great opportunity to rural students to improve their educational, employment and knowledge on world technological developments.
