ABSTRACT

This paper focus mainly on perception on gender in military approaches distinctively on women and men and not on women in isolation. The equity requires equal enjoyment by women and men of socially valued goods, opportunities, resources and rewards. It does not mean that women and men become the same, but that their opportunities and life chances should be equal. Women in Military analysis takes into account social and economical differences between women and men at each stage of policy development for the purpose of revealing potential different impact of policies, programmes and law on both; ensuring equal results for women and men in measures design and implementations of military.

KEYWORDS: Gender role, Equality, Discrimination, Social construction, Indian Army, Women.
