VASANT KUNJ, NEW DELHI-70.

ABSTRACT

In this paper we are going to discuss an outline of the Sixth Sense Technology. The Sixth Sense Technology is a mini-projector coupled with a camera and a cell phone, which acts as the computer and connected to the Cloud and the entire information stored on the web. The Sixth Sense can also obey hand signals. The camera is used to recognize objects around a person immediately, with the micro-projector superimpose the information on any facade, including the object itself or hand. Also we can admission or direct the information using fingers, like making a call by Extend hand on front of the projector and numbers will appear for to click. The camera also helps user to take pictures of the scene is viewing and later can arrange them on any surface.

KEYWORDS: Sixth Sense Technology, camera, cell phone.
