ABSTRACT:

Labor health, safety and welfare are the measures of promoting the efficiency of labor. The different welfare measures provided by the employer will have immediate impact on the labor's health, physical and mental efficiency, morale and overall efficiency of the labor and thereby contributing to the higher production. Some of the facilities and which fall within the preview of labor welfare include adequate canteen facilities, housing facility, and recreational facilities, medical facilities and, transportation facilities for traveling from & to the place of work.

This paper highlights the welfare measures taken in Indian Industry with special reference to the brass industry of Moradabad, the labor satisfaction level, and to identify the overall quality of work life of the labor. The Primary Data collection was done through questionnaire and secondary was from books, journals and articles. In some cases personal interview was needed at the time of filling up of questionnaire. For analysis, the collected data the researcher used simple percentage analysis. Different charts and graphs were drawn to interpret the collected data.

KEY WORDS: Job Satisfaction, Labor Health, Labor satisfaction.
