ABSTRACT

This paper explores the positive sides of Foreign Direct Investment (FDI) for India to steady the economy in a competitive rate. FDI would allow India to secure foreign infrastructure into India, which would increase India's capital base rapidly. Many countries have grown tremendously because of FDI. So, the benefits can be employment opportunities, modernisation, technology exchange, resource exchange, reduce spoilage, delivery of affordable products to customers and the like. Any country can experience good things in FDI. FDI is a long-term investment and is used by the developing countries as a source of their economic development, productivity growth, to improve the balance of payments and employment generation. Its aim is to increase the productivity by utilizing the resources to their maximum efficiency. The secondary data such as journal, magazine, newspaper and the like has been used to consolidate this study. This study is mainly focus on the scope, significance, opportunities, advantages and FDI inflow to India With respect to category-wise, Country-wise and sector-wise.

KEY WORDS: Economy, Economic Development, FDI, Opportunities Resources, Scope, Significance
